

Sandy Andrew has come up with yet another marvelous book that is very informative. It will guide you both spiritually and intellectually. **Your Never-ending Life: Book 1 of the Universal Learning Series** has brought his unique style of writing even further to the surface to enlighten the reader on such important matters as "What You Are", "The Universe and Energy", "The Path and Choices", and "Success or Failure", just to name a few. He has reached out and captured through his words and strong feeling the attention of the reader. He has also given examples, in plain view, of the universal laws for the reader to understand.

If you learned while exploring through Sandy Andrew's earlier book, **This Lifetime on Earth**, then his latest book, **Your Never-ending Life: Book 1 of the Universal Learning Series** should teach you even more and help you to further your leaning experience while on this big, blue planet we call Earth.

The book states that all things are energy. Homes, cars, mortals. Heaven, your spirit, your thoughts, and even God are forms of energy. Positive and negative energy are two subjects that are discussed throughout the book.

Everyone needs to know and understand what is going on around him, and sometimes it is difficult to put things into their right perspective. It is only human nature to either agree or disagree. After reading this book, you will know and understand more of the Universal Law of Learning; plus you will never stop learning and experiencing. Isn't it great that we, as humans, are part of the vast universe?
